

EDLESTON PRIMARY SCHOOL

7th June 2019

Dear parent/guardian

We are introducing a new way to report your child absent from school. Alongside leaving a message on the dedicated absence line (01270 685770 option 1) you can now report your child's absence using the Study Bugs app.

This can be downloaded from your App Store for Apple devices or google play for android. This is a free download. Once downloaded follow the instructions to register your child. The app allows you to send messages regarding your child's illness however please note this should only be used for reporting absence and not for any other school related query.

The app will use the information to collate illness and the type of illness reported to be used in a Nationwide study supported by the NHS.

Your child's data will be held securely by the provider and school. You are not required to solely use the app to report absence you may continue to call and leave a message if you prefer.

If you would like any help with downloading or using the app please pop into the office and speak with Mrs Green. <https://studybugs.com/about/parents>

Yours sincerely,
Mrs R Bagni
headteacher
